HIGH QUALITY EARLY CHILDHOOD RESEARCH AND PRACTICE

We are a unique model of researchers and practitioners working together under one roof to shape the future of early childhood. Our research findings are translated directly into classroom practice. Our researchers learn from teachers, children and families. Together, we make a collective impact on policy affecting early childhood.

SCHOOL FOR EARLY LEARNING

The A. Sophie Rogers School for Early Learning provides high-quality, research-based education to 100 infants, toddlers and preschoolers. A model demonstration site, we integrate research, practice and policy to enhance the developmental skills and school readiness of our students.

We Focus On:

An environment that inspires young children through play as a means of discovering the joy of language, art and the world around them;

Teachers who develop curriculum based upon the interests and goals of the students;

Individualized lessons plans designed to each child's strengths;

Family access to marriage and family therapists, social work graduate students and baby supplies at no cost.

COMMUNITY PROGRAMS

The Schoenbaum Family Center Community Programs is a network of community partners providing information on early childhood programming and family engagement for the residents of Columbus' Weinland Park neighborhood and the university area.

The Early Head Start Partnership Program provides high-quality early education, along with comprehensive child development, health, nutrition, social and other services to families who qualify. Our goal is to ensure that children from infancy to age three, receive a healthy and enriching start in life.

CRANE CENTER

The Crane Center for Early Childhood Research and Policy is a multidisciplinary research center dedicated to conducting high-quality research that improves children's learning and development at home, in school and in the community.

We Focus On:

Bringing together a multidisciplinary community of researchers at Ohio State who share a collective interest in children's well-being;

Strategic partnerships with organizations that are concerned with children's educational potential;

Impacting public policies that affect the success of children and communicating research findings to practitioners;

Maintaining data sufficient for large-scale multi-site research;

Conducting research that addresses pressing issues relevant to Ohio;

Increasing mentorship opportunities for scholars, students and staff;

Serving as a resource for quality professional development for early care and education programs.
